OUR SERVICES

Technology Partners

Sometimes it makes sense to completely outsource your development to a technology partner. We'll build a team around your company to handle every technology need, so you can stay focused on your core competency.

Project Rescue

Have you already burned way too much cash on a project that's destined to fail? We specialize in project rescue and turnaround. We'll audit the existing code, make recommendations and turn your project right around. Don't waste another minute.

Managed Hosting

We'll build the perfect cloud infrastructure to fit your exact needs. We'll manage everything, so you can stay focused on what you do best. Our systems are fully redundant, co-located and

Custom Applications

Some problems require completely custom solutions, and that's where we thrive. We take time to understand the business case, so we can architect an elegant technical solution. Then, we go to work writing bullet-proof and scalable code.

Cloud Migration

Paas (Platform as a Service) and IaaS (Infrastructure as a Service) cloud migrations are happening in nearly every enterprise the world over! The reduced TCO (Total Cost of Ownership) for cloud services, along with the agility gained from these platforms cannot be matched. The only thing that stands in the way of reaping the benefits is migrating your existing apps to the cloud! It can be a big job, but we know the best way to get from here to there.

UI Design

Some teams have great back end devs, but need help with the polish, shine and user experience. We're full-stack engineers, and we get both sides. If users don't understand how to use your application they think it's "broken." Don't worry, we'll "fix" it.

Architecture

Architecture is extremely important from the single application to the large enterprise! Good architecture means quickly implementing new features, being able to change code quickly, being able to pivot into other things, and a much lower TCO (Total Cost of Ownership) during the SDLC (Software Development Life Cycle).

run on the industry's fastest bare metal

Big Data

Big Data is here! Using the right solution to solve the write data problem is the key to unlocking the potential of Big Data. Unlocking the potential in data you already have can open all kinds of opportunity for your organization. Let us help you unlock Big Data at your organization.

System Integrations

Every organization, small and large alike, have different systems they wish worked better together. Having the right integrations can make all of the difference! Let us help you get your POS data to your CRM, or integrate your CMS with your App. When you understand the benefits and saved effort of integration, you'll wish you started with us years ago.

" Mindfire has been a great partner. We get exceptional service from them, and they do exceptional work! We couldn't be happier.

-Jennifer Dunyon | VP Communications

Getaway Today Vacations

We've had Mindfire build six different mobile apps for us over the past year. They've been a perfect technology partner. I've referred several friends and family members to them. - Wayne Lourenco | CEO
SpeedBrackets

" We used Mindfire to upgrade Xerox's DocuShare application on iOS and Android. Their work was spot-on. These guys know what they're doing! -Robert Bingham | Senior Director of DocuShare Cloud Operations

Xerox Corporation

WHAT WE'VE CREATED

SPEEDBRACKETS

SpeedBrackets incorporates the first ever 'dynamic' bracket and allows users to follow live games, select teams, save and change picks, create and join pools, and compete with friends and family through sporting events competitions. We used video/data streaming, data integration, data aggregation, platform as a service (PaaS), in-app chat, and social sharing.

GET AWAY TODAY

Get Away Today has helped more than 2 million people enjoy vacations to Disneyland® and beyond. They've become one of the world's leading providers of Disney vacations. We built a lightening fast booking engine and integrated accounting, a customer service client, layaway plans, ticketing apps and much more.

STATE DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL

We built a mobile app to improve customer access to available products in Utah's liquor stores. Users can rate their favorite beverages, search for specific product, locate the nearest liquor stores, get driving directions, leave comments and more.

KATHLEEN TESORI

Kathleen Tesori is a lifestyle coach, fitness icon and motivational speaker who has been featured in Oxygen Magazine, Muscle & Fitness, BodyBuilding.com and more. We built a responsive website to showcase her ~~workouts, recipes, blog, meal planning and products.~~

CAREADOPT

CareAdopt enables care management teams to support patients with chronic diseases and their psychiatric condition by treating the whole patient. We used data/behavioral analytics, push-notifications, dynamic content and location-based services.
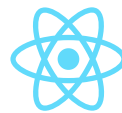

SWIFT AIR TRAVEL

Swift Air Travel is a new airline focused on bringing low-

cost aviation services to the massess. We built an internet booking engine to allow passengers to search and book flights online. We also built a customer service portal to bring real-time support to all Swift Air Travel passengers.

TECHNOLOGIES

...and many more.

Our People

We've meticulously vetted each engineer at Mindfire, so we KNOW they're freaking good at what they do (otherwise we wouldn't have hired them). Our people are our product, so we only hire the best.

Try us out. You won't be disappointed!

Our Process

We're an agile shop (scrums, sprints, standups, etc.), so you'll get to occupy the driver's seat. Working with our project manager, you'll set priorities, you'll direct our efforts, you'll slow us down or speed us up.

We'll work closely together as a team.

Don't waste time bouncing firm to firm. Hire the best!
